COVID Monitor

Monday, November 23, 2020

Statistics

- **Worldwide** confirmed cases surpassed 58.6 million, with a new daily record of close to 666,000 new cases reported on Friday.
- A record of 12,252 new cases was reported across the ASEAN+3 region on Saturday, with an additional 11,353 new cases reported yesterday.
- **Hong Kong** reported a steady increase of cases over the weekend, including 68 cases yesterday, levels last observed in August. Out of the 68 cases, only 7 were imported.
- China confirmed 11 new symptomatic cases yesterday, including two cases of local transmission in Shanghai.
- Japan reported a daily record of more than 2,500 new cases on Saturday, and 2,163 new cases yesterday.
- Daily new cases in Indonesia remained elevated, with almost 5,000 new cases reported on Saturday, the third-highest daily tally since the start of the pandemic.
- Cases continue to rise in many other parts of the world. The total case count passed 12 million in the United States, 6 million in Brazil, and 2 million in Russia over the weekend.

News

- Singapore and Hong Kong delayed the launch of their travel bubble for two weeks after Hong Kong recorded 43 new infections, including 13 untraceable local cases on Saturday. The travel bubble was supposed to launch yesterday and would have enabled travelers to skip quarantine under certain circumstances.
- Japan will partially suspend its “Go-To” domestic travel campaign in areas where cases are increasing. Details will be finalized over the coming days.
- Korea will impose stricter social distancing measures for greater Seoul from tomorrow onwards. The greater Seoul area has been moved to Level 2 of Korea’s tiered social distancing system, it’s third-highest level. Gatherings of more than 100 people will be banned and restrictions on restaurants and high-risk facilities tightened.
- Social distancing measures under the so-called PSBB’s transition phase in Indonesia’s capital Jakarta will be extended for two more weeks, until December 6.
- Singapore has tightened its border measures for travelers from Malaysia and Japan. All travelers from the two countries will have to serve a 14-day stay-home notice at dedicated facilities. This includes travelers under existing green lane arrangements.

**Overview of Confirmed COVID-19 Cases**

- **Total Cases**: The total number of confirmed cases reported in each country.
- **Cases per 1M Population**: The number of cases per million population.
- **New Cases**: The number of new cases reported in the past 24 hours.
- **New Cases (1-day avg)**: The average number of new cases over the last 7 days.
- **New Cases % New Cases**: The percentage of new cases over the total cases.
- **New Cases Total**: The total number of new cases reported in the past 7 days.
- **New Cases New Cases**: The average number of new cases per day.
- **New Cases Fatality Rate (%)**: The fatality rate calculated as deaths per confirmed infections.
- **Total Recovered**: The total number of recovered cases.
- **Recovery Rate (%)**: The recovery rate calculated as recovered cases over total cases.
- **Active Cases**: The number of active cases.
- **Resolved cases (%)**: The resolved cases calculated as recoveries plus deaths over total cases.

Source: AMRO-Asia Development Bank (AMRO) monitoring of WHO reports.

Notes:
- The data reflects the number of confirmed cases reported by each country as of the specified date. The fatality rate and recovery rate are calculated using the most recent data available. These metrics may change as additional information becomes available.
- The number of active cases is calculated as the difference between the total cases and the recovered cases.

**Additional Information**

- **Economy**: The country or region the data refers to.
- **Cases per 1M Population**: The number of cases per million population, calculated using the world's population as the denominator.
- **New Cases**: The number of new cases reported within the last 24 hours.
- **New Cases (1-day avg)**: The average number of new cases over the last 7 days.
- **New Cases % New Cases**: The percentage of new cases over the total cases.
- **New Cases Total**: The total number of new cases reported in the past 7 days.
- **New Cases New Cases**: The average number of new cases per day.
- **New Cases Fatality Rate (%)**: The fatality rate calculated as deaths per confirmed infections.
- **Total Recovered**: The total number of recovered cases.
- **Recovery Rate (%)**: The recovery rate calculated as recovered cases over total cases.
- **Active Cases**: The number of active cases.
- **Resolved cases (%)**: The resolved cases calculated as recoveries plus deaths over total cases.
