

Malaysia's Economic Activity and Recovery in 5 charts

1 Malaysia is poised to rebound strongly in 2021-2022.

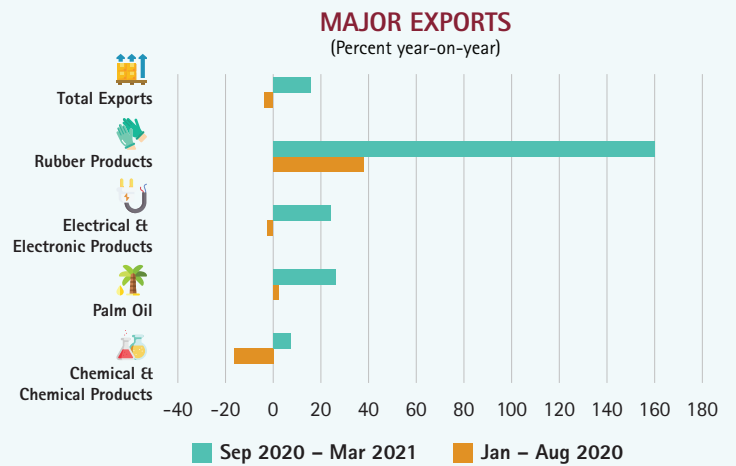

2 But recovery can be uneven and uncertain amid continued infections.

3 Comprehensive measures should continue to support economic activity and recovery.

4 Global recovery could bolster Malaysia's exports and foreign direct investments.

5 Fiscal buffers need to be restored once the recovery is firmly on track.

Government debt to remain above 60% through 2025 even with a gradual pace of fiscal consolidation.

Create fiscal space by reinstating the GST, among other revenue and spending measures.
