Recent Developments

Global News

- In the United States, as cases have fallen to levels last recorded at the beginning of the pandemic in March 2020, New York and California have lifted all pandemic restrictions.
- Cases in India continue to fall, marking eleven consecutive days with under 100,000 new infections. Daily new cases peaked at more than 400,000 cases in May.

Regional News

- Cases in Malaysia continue to gradually fall. Restrictions will be eased from July onwards, with a full reopening possible by October.
- Singapore will loosen restrictions from Monday, though at a slower pace than originally planned. Two people will be allowed to dine together at restaurants, and gyms and fitness studios can reopen with limited capacity.
- Thailand aims to fully open the country to foreign visitors by October. Some areas, such as Phuket, are aiming to open sooner under a sandbox plan dependent on the number of vaccinated island residents.
- On Sunday, Japan will lift its state of emergency in all but one prefecture. In some prefectures, including Tokyo and Osaka, some quasi-emergency measures will remain in place.

Vaccine News

- A large study finds that U.S. company Regeneron Pharmaceuticals’ antibody cocktail, Regen-cov, reduces deaths in hospitalized patients without own antibody response.

---

ASEAN+3 and Selected Economies: Total Vaccines Administered

### Graph: ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

---

ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

### Graph: ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Source: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
