Recent Developments

Global News

- Mask-mandate returns in parts of the US as average daily cases rose to above 26,000, a level last seen in end-May. The government is ramping up vaccinations for teenagers and young adults.
- A Lancet study in the UK found that 50 percent of people hospitalised with severe COVID-19 develop other health complications. This finding contradicts current narratives that COVID-19 is only dangerous in people with existing comorbidities and the elderly. The study covered more than 73,000 patients across 302 hospitals.

Regional News

- Indonesia has surpassed the daily cases in Brazil and India with an average of more than 44,000 cases per day. With the healthcare system facing tremendous strain, the military has deployed its doctors and opened emergency field hospitals.
- Confirmed cases in Vietnam rose to a record-high of almost 2,500 cases per day in the last 7 days. The delta variant has been reported in 58 out of the 63 provinces and cities.
- Myanmar reported an all-time high of 103 deaths and more than 4,600 cases per day in the last week. 74 townships are under stay-at-home orders as of July 12.
- The Philippines has reported its first locally transmitted cases of the delta variant. Among the 16 new delta variant cases today, 11 were locally transmitted.
- Malaysia has granted conditional approval for Sinopharm for emergency use. Sinovac vaccine will stop being administered after supply ends, with vaccination drive to be anchored by Pfizer-BioNTech vaccine going forward.

Vaccine News

- A study published in The Lancet found that the Pfizer-BioNTech vaccine produces 10 times more antibodies than Sinovac vaccine. The paper also cautioned that disease-fighting antibodies do not account for the full picture when it comes to measuring the ability to generate immunity and the effectiveness of COVID-19 vaccines.

ASEAN+3 and Selected Economies: Total Vaccines Administered

### Source:
Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.
- Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

### ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

### Source:
Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.
- Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
